SEJAL PATRA

ASPIRING FORENSIC DNA ANALYST & RESEARCHER

Email: sejalpatra2007@gmail.com Phone: 8895464654 Location: Phagwara, Punjab / Brahmapur, Odisha

LinkedIn: [LinkedIn Profile]

PROFESSIONAL SUMMARY

Dedicated and detail-oriented student currently pursuing a **B.Sc. in Forensic Science (Honours with Research)** at Lovely Professional University (LPU). Demonstrates strong academic grounding in molecular biology, DNA extraction techniques, genetic analysis, and chain of custody protocols. Passionate about contributing to justice and investigative accuracy in leading forensic institutions such as *Truth Labs Forensic Services* and *Bio Axis Research Private Limited*.

EDUCATION

B.Sc. Forensic Science (Hons. with Research)

Present

Lovely Professional University (LPU), Punjab

- Specialized Coursework: Molecular Biology, Forensic Serology, DNA Profiling, Crime Scene Investigation, Forensic Chemistry & Toxicology, Medical Law and Ethics.
- Actively participating in undergraduate research projects focusing on forensic genetics and laboratory validation techniques.

RESEARCH & ACADEMIC PROJECTS

DNA Extraction & Analysis Methodology Review

Academic Project

Lovely Professional University

- Evaluated comparative efficiency of organic vs. silica-based extraction protocols for degraded biological evidence.
- Documented standard operating procedures (SOPs) for handling blood, saliva, and epithelial cell samples under forensic standards.

Mock Crime Scene Investigation & Evidence Preservation

Practical Coursework

Department of Forensic Science, LPU

- Processed biological trace evidence from simulated crime scenes adhering strictly to chain of custody guidelines.
- Performed presumptive and confirmatory serological tests for blood, semen, and body fluids.

CERTIFICATIONS & WORKSHOPS

- **Hands-on Workshop on DNA Isolation & Electrophoresis:** Practical training on agarose gel analysis and PCR amplification techniques.
- **Forensic Serology & Crime Scene Ethics:** Seminar on evidence handling for legal admissibility and ISO/IEC 17025 standards.

TECHNICAL SKILLS

Laboratory Techniques
DNA Extraction, Polymerase Chain Reaction (PCR), Agarose Gel Electrophoresis, Spectrophotometry, Presumptive Blood & Body Fluid Testing.

Forensic Concepts
DNA Typing/STR Analysis Concepts, Biological Sample Preservation, Chain of Custody, Cross-Contamination Prevention.

Instrumentation & Software
Basic Thermocycler Operation, Micropipetting Precision, Microscopic Analysis, Data Analysis (Excel, SPSS basics).

CORE COMPETENCIES

- Strict Quality Control & Assurance
- Methodical Evidence Handling
- Scientific Report Writing
- Analytical Thinking
- Team Collaboration

CAREER OBJECTIVES

Seeking an internship or entry-level opportunity as a **Forensic DNA Trainee / Analyst** at premiere analytical laboratories such as *Truth Labs Forensic Services* or *Bio Axis Research Private Limited* to apply research knowledge and master DNA profiling procedures.
